CAREER OBJECTIVE

Final-year B.Tech Artificial Intelligence and Data Science student with a strong foundation in Python, SQL, Machine Learning, Natural Language Processing, Data Analysis, and Data Visualization. Experienced in developing practical AI/ML solutions, including resume screening and personalized recommendation systems, with hands-on knowledge of database integration and interactive dashboards. Proficient in Power BI, Microsoft Excel, Google Colab, Jupyter Notebook, Git, and GitHub. Strong analytical, problem-solving, and communication skills with a keen interest in building scalable, data-driven solutions.

EDUCATION

Tagore Institute of Engineering and Technology

2023-present

- B. Tech Artificial intelligence and data science (AI&DS)
- CGPA=8.5/10

Salem, Tamilnadu, India

Government higher secondary school

2023

- HSE=74%

Dharmapuri , Tamilnadu, India

PROJECTS

AI-Based Resume Screening System with Explainable Shortlisting
Python / NLP / SQL

• Extracted candidate skills from PDF resumes using NLP and stored structured data in an SQL database.
• Computed a transparent match score against job requirements, explicitly reporting matched and missing skills for auditable shortlisting.
• Built an interactive dashboard supporting both bulk and real-time single-resume screening.

Personalized Learning Recommendation System
Python / SQL / Content-Based Filtering

• Built a content-based filtering algorithm using similarity scoring to recommend courses based on performance history and preferences.
• Stored student and course data in an SQL database; presented recommendations through an interactive progress-tracking dashboard.

STRENGTHS

- Problem Solving
- Analytical Thinking
- Machine Learning
- Data Analysis
- Communication
- Continuous Learning
- Team Collaboration

TECHNICAL SKILLS

- Languages: Python, SQL, HTML
- Visualisation: Power BI, Microsoft Excel (Pivot Tables, Charts)
- Tools: Jupyter Notebook, Google Colab, Git, GitHub
- Core: Problem Solving, Version Control & Deployment

CERTIFICATIONS

- IBM Certification — Big Data and Deep Learning, 2025
- APEX — Python Programming
- Code builders —Full stack development

LANGUAGES

- English (fluent)
- Tamil (fluent)
